

M:2:I Individual Task Report

Weekly individual task reports are due no later than 12:00 p.m.

Project Information		
Project Name	MAVRIC	
Team name	MAVRIC Science	
Your Name	Josh Simac	
Week Number	6	
Individual Status Report		
My tasks are currently:	On Track	

Please put any comments below on your status with your tasks.

On Saturday, Ryan sent me with Colin to help him collect dirt since we had planned on testing our design sometime next week. We did not have proper tools, so there was no way we were going to be able to collect dirt. Once we got back from trying to collect dirt, we tried to fit our metric bolt through the collar and actuator because for some reason we couldn't fit it through. After we got it to fit, Gage asked us to see if the mechanical team needed help with the suspension, but they didn't. Since we didn't have much else to do, we had James help us test the new actuator to see if it worked like we needed it to.
