Please put any comments below on your status with your tasks.

After last weeks meeting, I was assigned the task of adding holes to the top collar in Solidworks. I could not edit the part file for the collar on my laptop because I did not know that I was using an outdated version of Solidworks. I ended up finishing the part in the M2I lab on saturday. Ryan put in the order to have it 3D printed shortly after and we now have the part. We decided not to 3D print the soil collection box because it will be faster and cheaper to manufacture it by hand. My task this week is to help Nick manufacture the soil box on Saturday.
