

# M:2:I Individual Task Report

Weekly individual task reports are due no later than 12:00 p.m.

Project Information		
Project Name	MAVRIC	
Team name	MAVRIC Science	
Your Name	Josh Simac	
Week Number	5	
Individual Status Report		
My tasks are currently:	On Track	

Please put any comments below on your status with your tasks.

At the meeting on Saturday, Nick was still working out how to manufacture the soil box, so I ended up helping Tom design the cap that we will use to fasten the top collar to the other collar. This took a while because the circle used to generate the holes to mount the motor is off center from the middle hole of the collar. This week, we decided to machine the soil box, so I will no longer be needed to help manufacture it by hand. This week, I will be learning how to do a mass estimate on SolidWorks. Other than that, all we have to do is wait for parts to be machined and get ready to test the design once we get all of the parts.
