The soil system was tested, and it failed. The soil fell out of the metal tube with a hole on the bottom. On Saturday, Nick, Colin, Tom, and I were brainstorming how to fix this problem while Ryan was machining the other collar and Martin was coding for the spectroscopy. 12:45 was about as long as I could stay because I had a Calc 2 review session at 1. My new task for this week is to work with Colin to secure the collar in place, and do any odd jobs that the team needs me to do.
