

## M:2:I Individual Task Report

Weekly individual task reports are due no later than 12:00 p.m.

Project Information	
Project Name	MAVRIC
Team name	MAVRIC Science
Your Name	Josh Simac
Week Number	8
Individual Status Report	
My tasks are currently:	On Track

Please put any comments below on your status with your tasks.

Last Saturday, Colin and I put two new screws into the cap and the top collar to secure it better. We also put the set screw and the bolt back in place. After that, I sanded down the inside of a rail and Colin sanded down the other rail. We did this because the inside was very rough metal and would wear the bolt down as it slides up and down. After we finished that, Ryan and I looked at how we could cut a mirror that we need for the spectrometer. We couldn't cut it so we ordered an alternative. For this upcoming week, Colin and I will try to create a design to allow us to keep connection even though the wires are spinning.

Task Report			
Task	Due Date	Progress	Status
Add holes to top collar in Solidworks	1/27/2018	100%	On Track
Upload all weekly reports to GitHub	2/17/2018	100%	On Track
Test run the soil collection	2/17/2018	100%	On Track
Work with Colin to secure the collar	2/24/2018	100%	On Track
Help design a wire brush connector	3/3/2018	0%	On Track
